Andrija Kostic

Front-End Developer

kostic.andrija00@gmail.com   linkedin.com/in/kosserin   andrijakostic.com   github.com/kosserin

Education

University of Kragujevac
Faculty of Engineering Sciences
09/2019 - Graduated on 02/2023
Mechanical engineering

Velika Plana
Electrotechnical school Nikola Tesla
09/2015 - 05/2019
Computer technician

Working Experience

Holycode (Neon)
Full-time
02/2023 - Present
- Develop and implement user interfaces using Angular and SCSS, translating design mock-ups into functional code
- Utilize Ionic's hybrid app framework to build interactive UI components and manage data flow effectively
- Conduct regular code maintenance and refactoring to improve code quality, modularity, and code reuse within the frontend codebase

Holycode (Neon)
Internship
08/2022 - 02/2023
- Developed practical experience with Angular, Ionic, and Cordova, contributing to the development of cross-platform applications
- Gained proficiency in utilizing Jira for project management, Bitbucket for version control, and executing various git commands for collaborative development

Local Freelance
Freelance
01/2022 - 03/2022
- Translated Figma design files into responsive HTML, SCSS, JavaScript and integrated Swiper touch slider for enhanced user experience
- Developed, implemented, and maintained a fully functional website for a local football school, encompassing the complete process from initial design to coding and successful deployment on a dedicated domain

Upwork Freelance
Freelance
12/2021 - 12/2021
- Efficiently translated design mockups into functional code using HTML, CSS, and JavaScript across diverse projects.

Technical Skills

`Angular` `React` `Ionic` `Cordova`
`Typescript` `Figma` `Capacitor` `Redux`
`Javascript` `HTML` `CSS` `SCSS`

Personal Projects

Frontend practice challenge
- Successfully tackled the challenge of reproducing 10 unique webpages, using HTML, SCSS, and vanilla JavaScript as the primary technologies for implementation

Build 15 JavaScript Projects
- Enhanced proficiency in developing without relying on frameworks, sharpening skills in raw HTML, CSS, and JavaScript implementation
- Gained in-depth knowledge of ES6+ functions and honed the ability to efficiently work with data

Application that simulates working with a flight company's database
- Crafted a dynamic web application using React, Typescript, and CSS modules
- Translated all pages and workflows from Figma into functional components

Courses

Angular The Complete Guide - Maximilian Schwarzmüller

React The Complete Guide - Maximilian Schwarzmüller

Complete Web & Mobile Designer in 2022: UI/UX, Figma - Andrei Neagoie

Osnove HTML, CSS i JavaScript - Milan Tair
